NOTE FROM HEIDI

Hello again!

One of my ongoing goals for 1st Credentialing has always been to fill a need in the medical community. The expertise we provide to our clients is, by default, filling a need, but the other, very important goal, is to help educate the public about payor enrollment. Ten years ago, we dealt with very different credentialing processes than we do today. 1st Credentialing has a unique perspective when it comes to this business. We credential every type of provider in every state and have seen the evolution firsthand. Credentialing a MD in Idaho is not equal to a MD in New York, or any other state. Credentialing a mental health provider is different from enrolling a dietician. Because of these variations, we want to keep you up to date on the changes that are happening in the payor enrollment field as much as possible. There is still a “secrecy” that the insurances have when it comes to their processes and requirements, so figuring out on your own can be very difficult. Understanding the credentialing process is important for providers and organizations so that expectations are realistic and plans can be made accordingly. Being prepared for the (long) credentialing process is critical to your bottom line!

Just to highlight some of the information we have already sent out to you:

1. The No Surprise Act has rules and guidelines for insurance companies as well as the providers themselves so that online provider directories are more accurately updated. Read about that [here](#).
2. Medicare will be streamlining the application process for multiple states this coming summer! We have been waiting for this change for a long time! Read more [here](#).
3. We have started a brand new Q & A series to highlight the most asked questions from our clients. You can see this short video series [here](#).

Thank you all for taking the time to read over our newsletters, eblasts, and important information emails, we hope you find it beneficial.

Best Regards,

Heidi Henderson
Founder/Principal, 1st Credentialing
